-- 12. In a process for preparing mevinolin by fermentation of a 1 culture medium, which includes dissolving mevinolin formed into the 2 culture medium obtained by cultivation of at least one of an Aspergillus 3 terreus and Aspegillus obscurus strain, and separating the strain from the 4 culture medium to obtain a separated culture medium, separating the 5 mevinolin from the separated culture medium, and recovering the end 6 product, the improvement which consists essentially of carrying out the 7 dissolving at a pH between about 8 and 9, and carrying out the separating of 8 the mevinolin at a pH of between 4.5 and 2.--9

--13. The process of claim 11, wherein the separating of the mevinolin is carried out at a pH between about 2 and about 2.2.—.

-- 14. The process of claim 11, further comprising adding an earth alkali metal salt, an earth metal salt, or a transition metal salt to the separated fermentation liquor.--
